JOURNAL OF OPTICS

Volume 14 Number 3 March 2012

PAPERS

METAMATERIALS AND STRUCTURED PHOTONIC MATERIALS

035101 Lasing action in multilayers of alternating monolayers of metallic nanoparticles and dielectric slabs with gain
Vassilios Yannopapas and Ioannis Epstaras

035102 Investigation of image magnification properties of hyperlenses formed by a tapered array of metallic wires using a spatially dispersive finite-difference time-domain method in cylindrical coordinates
Yan Zhao

035103 A giant red shift and enhancement of the light confinement in a planar array of dielectric bars
Vyacheslav V Khardikov, Ekaterina O Lerko and Sergey L Prosvirnin

NONLINEAR AND ULTRAFAST OPTICS

035201 Intensity-phase characterization of white-light continuum generated in sapphire by 280 fs laser pulses at 1053 nm
Tayyab Imran and Gonçalo Figueira

035202 Temporal analysis of solitons in photorefractive semiconductors
Andrzej Ziolkowski

035203 Nonlinear refractive index measuring using a double-grating interferometer in pump-probe configuration and Fourier transform analysis
Saifollah Rasouli and Mahnaz Ghorbani

035204 Determination of the coherence length in the vacuum-ultraviolet spectral region for the BPO₄ crystal
Xin Zhang, Gualing Wang, Shufeng Zhang, Erpan Zhang, Liyong Wang, Yong Zhu, Yicheng Wu and Chuangtian Chen

035205 Kerr-induced nonlinear focal shift in presence of nonlinear absorption
K Fehs and G Boulabeb

INTEGRATED PHOTONICS

035501 Nonreciprocal bistability in nonlinear fractal Fibonacci photonic crystals
Mohammad Hosain Teimourpour

035502 Tunable wide-angle acousto-optic filter in single-crystal tellurium
N Gupta, V B Voloshinov, O A Knyazev and L A Kulakova

035503 Optimization of band-pass filtering parameters of a Raman lidar detecting atmospheric water vapor
Kai-Fa Cao, Shun-Xing Hu and Ying-jian Wang

INTEGRATED PHOTONICS

035504 Control of blue-shift induced by the Rashba interaction in a two-dimensional electron gas
K Jamsheidi-Ghaleh, A Phirooznia and R Sharifi

035505 F₂-laser ablation of Fabry–Perot cavities in optical fibres: chemical sensors
V R Machavaram, R A Badcock and G F Fernando

035603 Photophoretic assembly of two-dimensional crystals from microparticle suspensions
Hongxiang Lei, Yao Zhang, Chong Xu and Baojun Li

Bibliographic codes CODEN: JOOPCA 14 (3) 035101–035705 (2012) ISSN: 2040-8978
Journal of Optics

IOP Publishing is a not-for-profit learned society publisher with a reputation for quality and high standards. It has a comprehensive range of products and services for physics and physics-related communities and in particular is an established leader in the world of scientific journals and is at the forefront of electronic publishing. Authors and readers benefit from the rigorous refereeing procedures, prompt publication times and rapid response to research developments, ensuring that the journals are timely, topical and fully validated. There are no page charges.

Journal scope

Whilst the journal will consider all papers within the field of optics we would particularly welcome papers in the following fields:

- Metamaterials
- Nanophotonics
- Integrated optics
- Terahertz optics
- Photons at all life science interface
- Singularities
- Light confinement
- Ultrafast optics

Quantum optics and semiclassical optics are excluded and covered by Journal of Physics B: Atomic, Molecular and Optical Physics.

A brief guide for authors

A submission to Journal of Optics must be the original work of the author(s) and must not be published elsewhere or be under consideration for another publication in its submitted or a substantially similar form in any language.

- Research Papers (up to 30 journal pages) based on 500 words per page, one figure is equivalent to 250 words.
- Rapid Communications (up to 6 journal pages).
- All Rapid Communications must be submitted with a covering letter, justifying the urgency of the manuscript, via a member of the Editorial Board. The most important criteria for acceptance of a Rapid Communication are novelty, significance, topicality and timeliness.
- Reviews (up to 30 pages in length).
- Such articles are generally commissioned by the Editorial Board.
- PhD Theses (up to 30 pages in length).
- These articles will be authored by the PhD student and their supervisor and will present sufficient information to enable an active researcher to access another un Köln quickly.

What to submit

The text of the article can be prepared using Microsoft Word or any common word processor. Articles should be submitted as separate files, preferably in Encapsulated PostScript (EPS) format. Package the text and figure files into a variant of TeX. Figures should be submitted as separate files, preferably in EPS format. Package the text and figure files into a variant of TeX. Colour illustrations and supplementary data can enhance the electronic version of your article. For further information see the Guidelines for authors available from our Author services website at authors.iop.org.

How to submit

You can send your article to us using one of the following methods: Web submission (at authors.iop.org) or, from your IOP author homepage—use our Author services website at authors.iop.org for more information. FTP (ftp.iop.org/incoming/jopt) or e-mail to jopt@iop.org. Full details on electronic, hard-copy and disk submission are provided in the Guidelines for authors available from authors.iop.org.

Colour reproductions of illustrations and supplementary data in our Electronic Journals (eprintsence.org/gp) is free of charge. However, for colour reproduction in the printed journal, authors will be asked to pay the additional costs incurred. Supplementary data can enhance the electronic version of your article. For further information see the Guidelines for authors available from authors.iop.org.

Articles in Journal of Optics are abstracted in: Cambridge Scientific Abstracts (Environmental Engineering Abstracts, Bioengineering Abstracts); INSPEC® Information Services; Chemical Abstracts; Mass Spectrometry Bulletin; Engineering Index®/Ei Compendex®; ISI (Science Citation Index®, Social SciSearch®, ISI Alerting Services, Current Contents®/Physical, Chemical and Earth Sciences, Current Contents®/Engineering, Computing and Technology®); Article@INIST; PASCAL Database; Aerospace Database.
