SPECIAL ISSUE ON GRAPHENE

030301 Editorial
Alberto F Morpurgo and Björn Trauzettel

TOPICAL REVIEWS

033001 Electron–hole asymmetry and energy gaps in bilayer graphene
M Macháč-Kračovský, E McCann and Vladimir I Fal’ko

033002 Klein tunneling in single and multiple barriers in graphene
J M Pereira Jr, F M Peeters, A Chaves and G A Farias

033003 Electronic and magnetic structure of graphene nanoribbons
J J Palacios, J Fernández-Rossier, L Brey and H A Fertig

034005 The magnetic field particle-hole excitation spectrum in doped graphene and in a standard two-dimensional electron gas
R Roldán, M O Goerbig and J-N Fuchs

SPECIAL PAPERS

034001 Periodically modulated geometric and electronic structure of graphene on Ru(0 0 0 1)
B Borca, S Barja, M Garnica, J J Hinarejos, A L Vázquez de Parga, R Miranda and F Guinea

034002 Energy and transport gaps in etched graphene nanoribbons
F Molitor, C Stampfer, J Güttinger, A Jacobsen, T Ilan and K Ensslin

034003 Graphene rings in magnetic fields: Aharonov–Bohm effect and valley splitting
J Wurm, M Wimmer, H U Baranger and K Richter

034004 Excitonic condensation in a double-layer graphene system
Maxim Yu Kharitonov and Konstantin B Efetov

034006 On the spectrum of a magnetic quantum dot in graphene
A De Martino and R Egger

034007 Metallic proximity effect in ballistic graphene with resonant scatterers
M Tisov, P M Ostrovsky and I V Goryan

034008 Resistance modulation of multilayer graphene controlled by the gate electric field
Hisao Miyazaki, Songlin Li, Akinobu Kanda and Kazuhiro Tsukagoshi

RAPID COMMUNICATION

032001 High-reflectivity GaN/air vertical distributed Bragg reflectors fabricated by wet etching of sacrificial AlN layers
C Xiong, P R Edwards, G Christmann, E Gu, M D Dawsion, J J Baumberg, R W Martin and I M Watson

REGULAR PAPERS

035001 The effect of inhomogeneous dopant distribution on the electrical transport properties and thermal stability of CdTe–Cl single crystals
V D Popowsky, F F Szov, O A Parfenjak and Z F Troyini (Ivasiv)

035002 Dependence of melting, roughness and contact resistances on Ge and Ni content in alloyed AuGe/Nil/Au-type electrical contacts to GaAs/AlGaAs multilayer structures
T S Abhilash, Ch Ravi Kumar, B Sreedhar and G Rajaram

(Continued on inside back cover)
Semiconductor Science and Technology

IOP Publishing is a not-for-profit learned society publisher with a reputation for quality and high standards. It has a comprehensive range of products serving the physics and physics-related communities and in particular is an established leader in the world of scientific journals and is at the forefront of electronic publishing. Authors and readers benefit from the rigorous refereing procedures, prompt publication times and rapid response to research developments, ensuring that the journals are timely, topical and fully validated. There are no page charges.

**Journal scope**

Semiconductor Science and Technology covers applied or explicitly applicable experimental and theoretical studies of the properties of semiconductors and their interfaces, devices and packaging, including:

- electrical properties
- optical properties
- device design
- device fabrication

A brief guide for authors

A submission to Semiconductor Science and Technology must be the original work of the author(s) and must not be published elsewhere or be under consideration for another publication in its submitted or substantially similar form in any language.

Research Papers (up to 3500 words or 4 journal pages) will be considered. Rapid Communications (no more than 1500 words or 4 journal pages) will be considered. Rapid Communications are brief, urgent communications that require rapid publication and are to be submitted alongside a short letter of justification explaining why the manuscript is at the forefront of electronic publishing. Authors and readers benefit from the rigorous refereing procedures, prompt publication times and rapid response to research developments, ensuring that the journals are timely, topical and fully validated. There are no page charges.

**What to submit**

The text of the article can be prepared using Microsoft Word or any common variant of TeX. Figures should be submitted as separate files, preferably in Encapsulated PostScript (EPS) format. Package the text and figure files into a single compressed archive file (e.g. WinZip, PKZip, tar+gzip, etc). Articles in Semiconductor Science and Technology are abstracted in: INSPEC® Information Services; Chemical Abstracts; Engineering Index/Ei Materials Science Citation Index®, Current Contents®/Physical, Chemical and Earth Sciences; Applied Science and Technology Abstracts; Applied Science and Technology Index, PASCAL Database; ArticleFirst® INFOPHILE Abstracts Journal.

**How to submit**

You can send your article to us using one of the following methods: Web submission (at authors.iop.org/submit, or from your IOP author homepage—see our Author services website at authors.iop.org for more information), FTP (ftp.iop.org/incoming/sst) or e-mail to sst@iop.org. Full details on how to structure an article, including specific information on figures, tables and references, are given in the Guidelines for authors available from our Author services website at authors.iop.org.

**International offices**

**American office**

IOP Publishing, Inc.
The Public Ledger Building, Suite 929
192 South Independence Mall West
Philadelphia PA, 19106, USA
Tel: +1 215 822 1000
Fax: +1 215 827 8879
E-mail: iopl@iopjournalsa.com

**Chinese office**

Chinese authors may also submit papers to:
Professor Mingfang Lu FInstP (mingfang.lu@iop.org)
Chief Representative/Editorial Manager
at the address of the Chinese office given below.

Russian authors may also submit papers to:
Dr Z Sokolova at the address of the Russian office given below.

**Colour illustrations and supplementary data**

Colour reproductions of illustrations and supplementary data in our Electronic Journals (www.iop.org/journals/sst) is free of charge. However, for colour reproduction in the printed journal, authors will be asked to pay the additional costs incurred. Supplementary data can enhance the electronic version of your article. For further information see the Guidelines for authors at authors.iop.org.

**Colour reproduction of illustrations and supplementary data**

Articles in Semiconductor Science and Technology are abstracted in: INSPEC® Information Services; Chemical Abstracts; Engineering Index/Ei Materials Science Citation Index®, Current Contents®/Physical, Chemical and Earth Sciences; Applied Science and Technology Abstracts; Applied Science and Technology Index, PASCAL Database; ArticleFirst® INFOPHILE Abstracts Journal.

**Semiconductor Science and Technology** is a journal recognized by The European Physical Society.
